DETAILED ACTION

Restriction Requirement

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claim(s) 1-7 and 10-14, drawn to a process comprising steps of fluoropolymer coagulation, drying while kneading, and admixing a mixture of vulcanizing agent and accelerator.

Group II, claim(s) 8-9, drawn to a process comprising steps of fluoropolymer coagulation, drying, followed by kneading, and admixing a mixture of vulcanizing agent and accelerator.

Group III, claim(s) 15, drawn to drawn to a process comprising steps of fluoropolymer coagulation, drying while kneading, and admixing a both a mixture of vulcanizing agent and accelerator, and vulcanizing agent

3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: For the reasons set forth in the International Preliminary Examination Report of parent application PCT/JP00/05906, incorporated herein by reference, inventions of at least Group I lack an inventive step over US Patent 3,876,616 in view of JP 55-45734 and JP 56-90836 (each cited in the international Search Report). Accordingly, unity of invention is lacking because the ~~special technical~~ feature linking the inventions, do not provide a contribution over the prior art.

13.2 Circumstances in Which the Requirement of Unity of Invention Is to Be Considered Fulfilled

Where a group of inventions is claimed in one and the same international application, the requirement of unity of invention referred to in Rule 13.1 shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression "special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. (Underlining added.)

4. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 1713

Election of Species Requirement

5. This application contains claims directed to more than one species of the generic invention.

These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

6. The species are as follows:

- a. fluorine containing elastomeric copolymers,
- b. vulcanizing agents, and
- c. vulcanization accelerators.

7. Applicant is required, in reply to this action, to elect a single species of (a), (b) and (c) to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

8. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a). The following claim(s) appear to be generic to the above species in their respective groups: Claims 1, 3-10 and 15..

9. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the same reasons set forth in the International Preliminary Examination Report discussed above.

Conclusion to Restriction/Election Requirement

10. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

11. A telephone call was made to Mr. Andrew D.Meikle on 8/1/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1713

12. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
